CABLE TRACERS

- All components are fully fuse protected and intrinsically safe
- Model R2000 Receiver has two detectors in its tip which are tuned to pick up the electromagnetic signals or electrostatic signals
- LEDs and sensitivity settings indicate the relative signal strength
- Model S2600 Load Signal Generator, when connected to an energized line, will draw a rapidly fluctuating current pulse from the source, causing the power line to emit an electromagnetic signal
- Model T2200 Transmitter injects a signal into an unenergized conductor R2000
- Model A2201 Inductive Clamp when clamped around the energized line and plugged into the T2200 will induce a signal onto the downstream (load) side
- Includes: Receiver, load signal generator, transmitter, clamp-on transmitter accessory, cordsets and adapter
